PERFORMANCES

HARLEY-DAVIDSON MC - Meets HARLEY DAVIDSON specifications

Features and benefits

- Dedicated formula reinforced with Extreme Pressure additives for improved gear protection.
- Very good lubricating properties for easy shifting, reduced wear and increased engine life.
- High cleaning and dispersing properties to maintain engine cleanliness.
- The API SM standard was designed to offer better oxidation resistance, strict deposit protection, low wear of components and low temperature performance over the life span of the engine.
- JASO (Japanese Automobile Standards Organization) has developed its own standard for 4-stroke motorcycle motor oils - JASO T903: 2023. It consists of three parts: Engine performance, clutch friction performance, physicochemical limits. Specification JASO MA2 provides the most efficient friction values to ensure best clutch friction engagement in all riding modes.
