

# COMBUSTION CHAMBER CLEAN

**Additive to add to gasoline  
For car engine's combustion chamber**

## **TYPE OF USE**

MOTUL Combustion Chamber Clean is a High-Performance Additive for use in all petrol engines.

Removes operationally caused contamination at the inlet valve, pistons and the entire combustion chamber.

Dissolves resins and gums in the carburettor and injection system.

Removes coking and unburned carbon residues in the upper cylinder area.

## **PERFORMANCE**

Effect of cleaning after the first application – clean and powerful combustion process and highly efficient engine running. Excellent cleaning of the inlet valves and injector nozzles (suitable for direct injection as well). Positive impact on fuel consumption as well as reduced exhaust gas emissions. Protects against corrosion and considerably prolongs the life span of the fuel system and catalytic converter. Restores the needed power for an optimum engine performance.

## **RECOMMENDATIONS**

Directly pour one can of MOTUL Combustion Chamber Clean into the fuel tank before refueling.

Application frequency depends on the quality of the used fuel.

The product also can be used before every tank filling.

Product works during operation.

Sufficient for 40-60 liters of fuel. Add 50 ml per 10 liters for larger fuel tank if needed.

## **SECURITY**

Refer to the MSDS and the information mentioned on the product label bottle for further details.

We retain the right to modify the general characteristics of our products in order to offer to our customers the latest technical development.

Product specifications are not definitive from the order which is subject to our general conditions of sale and warranty.
