

DIESEL SYSTEM CLEAN

Diesel injector and Diesel fuel system cleaner
Cleaning additive to add to Diesel fuel

TYPE OF USE

MOTUL Diesel System Clean is a cleaner additive design to be used in all types of Diesel injection systems, with indirect or direct injection, naturally aspirated or turbocharged, with or without DPF (Diesel Particulate Filter) and with or without SCR (Selective Catalyst Reduction) systems.

MOTUL Diesel System Clean effectively cleans:

- injector nozzle fouling
- condensation in the fuel system
- gumming in the injection pump
- dirtying of combustion chambers and inlet valves

MOTUL Diesel System Clean provides perfect lubrication during cleaning phase and prevents removed micro-particles from depositing. Moreover, it prevents from Diesel fuel oxidation and micro-organisms' formation.

PERFORMANCE

MOTUL Diesel System Clean cleans injectors and protects from injector nozzle fouling.

Removes operational caused contaminations and optimizes therefore the atomization of the fuel and the combustion process, maintaining the engine performance and ensuring operational reliability.

Optimized combustion improves cold start behaviour and exhaust values.

Increased fuel lubricity reduces wear, optimizes fuel consumption as well as emission values and.

Protects the system against corrosion and the diesel fuel from oxidation.

Clean and powerful combustion process and highly efficient engine running contributes to overall fuel economy.

RECOMMENDATIONS

Add to the fuel tank before filling up.

Recommended for all diesel engines.

Add one can for 60L of diesel.

Product works during operation.

Add 300 ml for every additional 60L of diesel if needed.

SECURITY

Refer to the MSDS sheet and the information mentioned on the product label.
