

ENGINE CLEAN MOTO

**Engine cleaner before drain
Additive to add to engine oil before oil drain
For motorcycle 4 stroke engine**

TYPE OF USE

Engine cleaner additive to be used prior to oil change. Specifically designed for 4-stroke engines of Motorcycles, ATVs, UTVs, PWCs and Snowmobiles. Restores engine compression by eliminating black sludge, carbon deposits and varnishes. Protects the engine, keeps the new oil clean longer.

PERFORMANCE

MOTUL Engine Clean Moto, added to engine oil before draining, allows to:

- Reduce wear.
- Decrease oil and fuel consumption.
- Increase compressions on all cylinders in the same way.
- Decrease exhaust pollutants emissions.
- Evacuate deposits, varnishes and other combustion residues from sensitive areas such as hydraulics lifters or piston grooves and rings.
- Take maximum benefit from fresh oil which will be filled after draining.
- Increase catalytic converter's lifetime.

RECOMMENDATIONS

Prior to oil change, add a dose (200 ml) of **MOTUL Engine Clean Moto** to the motor oil.

Then run the engine idle for 15 minutes without moving the vehicle.

Turn off the engine and change the oil and replace the oil filter.

Repeat every other oil change.

Use MOTUL Boost and Clean for a perfect fuel system cleaning and to improve engine performance.

SECURITY

Refer to the information mentioned on the label and the MSDS sheet.
