

FUEL SYSTEM CLEAN AUTO

Fuel system cleaner
Additive to add to gasoline
For car engine with carburetors or injection

TYPE OF USE

MOTUL Fuel System Clean Auto is designed to be used in all types of gasoline engine with injection or carburetors, naturally aspirated or turbocharged with or without catalytic converter, using leaded or unleaded gasolines and biofuels.

Effectively cleans dirtying and clogging which appear in the whole fuel system:

- condensation in the fuel system
- gumming in the carburetor
- injector nozzle fouling
- dirtying of combustion chambers and inlet valves

Provides perfect lubrication during cleaning process and prevents removed micro-particles from depositing.

PERFORMANCE

MOTUL Fuel System Clean Auto removes operational caused contaminations in the entire fuel system and prevents the formation of new deposits keeping the engine performance on the desired high level.

Perfect lubrication reduces wear and optimizes fuel consumption.

A clean and powerful combustion reduces emission values and increases lifetime of the fuel system and the catalytic converter.

Protects the system against corrosion and the fuel from oxidation.

RECOMMENDATIONS

Add to the fuel tank before filling up.

Recommended for both, PFI- and DI-gasoline engines.

Add one can for 60 L of gasoline.

Product works during operation.

SECURITY

Refer to the MSDS sheet and the information mentioned on the product label.
