

ENGINE CLEAN MOTO

**Engine cleaner before drain
Additive to add to engine oil before oil drain
For motorcycle 4 Stroke engine**

TYPE OF USE

MOTUL ENGINE CLEAN is designed to be used in all types of motorcycle 4 stroke engines, with or without catalytic converter, using all kind of fuel. MOTUL ENGINE CLEAN effectively cleans deposits and clogging which appear in the engine. The removed micro-particles are then evacuated at the time of the oil drain. MOTUL ENGINE CLEAN provides a perfect lubrication during cleaning process.

PERFORMANCES

MOTUL ENGINE CLEAN, added to engine oil before draining, allows to:

- reduce the wear
- decrease oil and fuel consumption
- increase compressions on all cylinders in the same way
- decrease exhaust pollutants emissions
- evacuate deposits, varnishes and other combustion residues from sensitive areas such as hydraulics lifters or piston grooves and rings
- take maximum benefit from fresh oil which will fill engine after draining
- increase catalytic converter's lifetime

RECOMMENDATIONS

Before each oil drain, add directly in the oil sump a can of MOTUL ENGINE CLEAN to hot used oil.

Let the engine idling for 15 minutes (without riding).

Drain the oil and change the oil filter. Refill with fresh oil.

Do not exceed the recommended proportion. If necessary, proceed to 2 successive treatments.

Combined with FUEL SYSTEM CLEAN, ENGINE CLEAN provides a very appreciable reduction of exhaust pollutants emissions.
