

INTENSE CLEANER

Gelled cleaner stripper

DESCRIPTION

INTENSE CLEANER is a thixotropic gel stripper free from chlorinated solvents, specially developed for cleaning and stripping mold residues from steel or aluminum molds. It is recommended for removing release agents during injection molding operations: it effectively eliminates silicones, paintable silicones, esters, waxes, mineral blends such as stearates used in combination with polystyrene and polyamide pellets, as well as deposits generated by the process.

INTENSE CLEANER can also be used on vertical surfaces to remove paints, and by extension, powders, resins, varnishes, and inks. Its 400ml aerosol packaging allows for easy and precise application, even in the most hard-to-reach areas.

APPLICATIONS

Apply the product to the molds or the surface to be cleaned. Let it sit for a few minutes, then wipe with a cloth to remove the dissolved residues.

- Cleaning of injection molds, removal of styrene residues.
- Cleaning of mold cavities and removal of various materials and oxidation traces.
- Cleaning of mold vents, ejector guides in plastics processing.
- Removal of temporary workshop markings.
- Removal of paints and inks.

ADVANTAGES

- Excellent wetting and covering power
- Ultra-fast action time
- Thixotropic, suitable for vertical surfaces
- Universal, effective on all types of paints and resins
- Free from chlorinated solvents

TECHNICAL INFORMATION

TECHNICAL CHARACTERISTICS	UNITS	METHOD	INTENSE CLEANER
Color	-	Visual	Blue
Density	-	ISO 12.155	0.905
Self-Ignition Point	°C	ASTM E 659	200.0
Operating range temperature	-		- 10 to + 80 °C

These characteristics are given only for information and can be updated over time.

HEALTH AND SAFETY

- Free from methylene chloride, N-Methyl-2-Pyrrolidone, ketones, and chlorinated solvents.

INSTRUCTIONS

Storage Conditions :

To ensure any deterioration of the product, always store the product between 5°C and 40°C. Keep away from direct sunlight and store in a covered, cool and dry area.

SERVICES AND EQUIPMENT

In addition to its product ranges, MotulTech can provide tools and services for the maintenance and monitoring of your lubricants. Please contact your technical sales representative for more information.

Important Notice

Information disclosed in this technical data sheet is based on MOTUL's experience and know-how in the development and manufacture of lubricants and other chemical products according to the current state of knowledge.

Any chemical product must be used in the intended application and in accordance with the recommendations provided in its safety data sheet freely consultable via the site <https://www.quickfds.com/fr/>. The performance of our products may be influenced by a series of factors, including conditions of use, application methods, operational environment, pretreatment of components, possible external contamination, etc ... For these reasons, universal recommendation of our products is impossible. The information in the technical data sheet represents general, non-binding guidelines and is given for guidance only. No express or implied warranty is given regarding the properties of the product or its suitability for a given application.

Therefore, we recommend consulting an application engineer to discuss application conditions and product performance criteria before use. It is the user's responsibility to test the functional suitability of the product and to use it under appropriate safety conditions. Our products are subject to continuous improvement with the aim of improving performance or bringing them into compliance with any new and possible regulations concerning them. We reserve the right to change our product lines, our products and their manufacturing processes and any provisions of our publications at any time without notice. This technical sheet cancels and replaces all previous editions.

We expressly draw the attention of any user to the fact that our product has not been designed and tested for use in the field of aeronautics as an "onboard" product or in the field of nuclear power production. Any use that may be made of the product in one of the aforementioned sectors will be under the exclusive responsibility of the user. Any reproduction, whatever its form, requires the prior written consent of MOTUL. All rights reserved.
