

MOTUL ALL IN ONE ULTRA DIESEL

Concentrated Diesel multi-action cleaner
Curative additive to add to Diesel fuel
Bottle 300 ml

CONSEILS D'UTILISATIONS

MOTUL® ALL IN ONE ULTRA DIESEL is a complete concentrated multi-action curative fuel additive cleaner for Diesel injection systems used in all types of Diesel engines, indirect or direct injection, naturally aspirated or turbocharged, with or without DPF (Diesel Particulate Filter), with or without SCR (Selective Catalyst Reduction), and using Diesel or Biodiesel fuel. MOTUL® ALL IN ONE ULTRA DIESEL is a concentrated Diesel additive compatible with Biodiesels B7 (Biodiesel 7%) and B10 (Biodiesel 10%).

MOTUL® ALL IN ONE ULTRA DIESEL effectively cleans deposits and fouling inherent in the operation of Diesel engine fuel systems thanks to its curative multi-action properties thus limiting:

- injector nozzle fouling
- dirtying of combustion chambers and inlet valves
- gumming in the injectors and injection pump
- condensation in the fuel system

MOTUL® ALL IN ONE ULTRA DIESEL provides a perfect lubrication during cleaning phase and prevents removed micro-particles from depositing.

By eliminating deposits and fouling from valves, injectors and combustion chambers, MOTUL® ALL IN ONE ULTRA DIESEL enables powerful combustion to restore engine performance.

MOTUL® ALL IN ONE ULTRA DIESEL also increases the Cetane number of the fuel, achieving optimal combustion and reducing fuel consumption.

MOTUL® ALL IN ONE ULTRA DIESEL curative multi-action additive is also formulated to aid in the regeneration of the particulate filter, thereby reducing exhaust gas and particulate emissions.

MOTUL® ALL IN ONE ULTRA DIESEL protects Diesel fuel from oxidation and thus prevents the formation of micro-organisms in the fuel circuit.

PERFORMANCES

A clean fuel system is a crucial condition for optimal engine operation (good combustion). MOTUL® ALL IN ONE ULTRA DIESEL therefore makes it possible to:

- Clean the injectors (for better fuel atomization) and the high-pressure pump
- Avoid the formation of deposits on the intake valves and in the combustion chamber
- Disperse the condensation water to avoid any oxidation in the injection system

MOTUL ALL IN ONE ULTRA DIESEL

Concentrated Diesel multi-action cleaner
Curative additive to add to Diesel fuel
Bottle 300 ml

Using MOTUL® ALL IN ONE ULTRA DIESEL will assure you to:

- Reduce fuel consumption and pollutant emissions at the exhaust (smoke, fumes...)
- Restore original engine power and performance
- Increase lifetime of the fuel injection systems and exhaust after treatment systems
- Improve cold starts and drivability comfort

MOTUL® ALL IN ONE ULTRA DIESEL is highly recommended before the vehicle technical inspection.

RECOMMANDATIONS

Pour the entire bottle of MOTUL® ALL IN ONE ULTRA DIESEL directly into the Diesel fuel tank before refueling the vehicle.

Drive normally until all the fuel has been used up, the entire fuel system will then be completely cleaned, from the tank to the injectors and the combustion chambers, and the particulate filter.

One dose is sufficient for tanks from 50 liters.

MOTUL® ALL IN ONE ULTRA DIESEL is a concentrated product, do not exceed the prescribed dose.

If necessary, make 2 successive treatments.

To preserve the benefits of cleaning, then use MOTUL® ALL IN ONE ULTRA DIESEL regularly.

For best results, use MOTUL® ENGINE FLUSH pre-drain additive before every oil change.

SECURITY

Refer to the MSDS – Material Safety Data Sheet and the information mentioned on the product label.

Dangerous. Respect the precautions for use.
