

SPORT 5W50 DE

100% SYNTHETIC BASE

DESCRIPTION

Very high performance cars powered by Gasoline or Diesel engines, naturally aspirated or turbocharged, multi-valves direct or indirect injection. Tuned engines operating on a wide range of engine rpm and temperatures, in severe driving conditions.

Engines producing medium to high fuel dilution in the oil.

Suitable for all types of fuels, leaded or unleaded gasoline, Ethanol, LPG, Diesel and biofuels.

APPLICATIONS

Ester Technology: Synthese-Technologie formula based on Ester to ensure outstanding oil film resistance at very high temperature, for maximum horsepower, torque output and wear protection. Oil pressure is stable whatever the conditions of use.

Very high API (American Petroleum Institute) performance level for improved oxidation resistance, improved deposit protection, better wear protection, and better low-temperature performance over the life duration of the oil. Perfect compatibility with the latest generations of engines requiring a lubricant with the specification API SN / CF.

The FORD WSS M2C-931C specification requires the lubricant to be both API SN and 5W-50 in order to perfectly lubricate certain high-performance Gasoline engines of FORD vehicles such as Ford Focus RS 2.3 EcoBoost AWD and Ford GT produced from 2016, and Mustang GT350, GT350R from 2018.

The FORD WSS M2C-931C specification is backward compatible with the 931A and 931B specifications but does not cover the 931D specification. MOTUL® SPORT 5W-50 must therefore not be used on vehicles requiring the FORD WSS M2C-931D specification. In case of doubt, before use always refer to the vehicle maintenance booklet.

Viscosity grade 5W-50 allows excellent oil flow into the engine, faster oil pressure set up and faster revs rising while ensuring great engine protection at high temperatures.

SERVICES AND EQUIPMENT

In addition to its product ranges, MotulTech can provide tools and services for the maintenance and monitoring of your lubricants. Please contact your technical sales representative for more information.

Important Notice

All information and rules about health, safety and the environment are mentioned on the safety data sheet. It provides information about risks, safety procedures and first aid emergency rules. It clarifies all procedures to implement in the case of an accidental spillage, and for the disposal of the product and its effects on the environment. The safety data sheet is available on www.motul.com.

Our product contains natural additives which are likely to modify the colour of the concentrates without altering its performance. The specifications of our products are definite only at the time of order, and are subject to our general sale and guarantee conditions. To give our customers the latest technical developments, the general characteristics of our products may vary.
