

**VALVE EXPERT**

**Lead Substitute**  
**All engines**

**TYPE OF USE**

All old engines fitted with soft exhaust valve seats which require lead in the gasoline to lubricate and protect from recession : cars, bikes, boats, gardening engines...  
Must not be used with engines fitted with catalytic converters.

**PERFORMANCES**

The Phosphorus formulation provides outstanding valve seats lubrication and protects from recession.  
Better performance than Potassium based products and gasoline.

**RECOMMENDATIONS**

Press on the bottle to fill the upper container and pour the right dosage in the gas tank before refilling with unleaded gasoline.
